

Antique Fireplaces **Reclaimed and Custom Fireplace** **Surrounds and Mantels**

A fireplace is the focal point of the room. Often the most significant architectural element in the interior space, it sets the stage for mood, style and character.

We acquire unique fireplaces and mantels from around the world, from elaborate Baroque masterpieces in marble to ornamental Spanish Revival styles, and sleek, limestone designs for contemporary applications.

Recovered from English manor houses, Victorian mansions, from old hotels and estates, we specialize in hand-carved stone and century-old fine wood mantels and fireplace surrounds from the 17th through 20th century.
